

Stefan Laux

Application Developer Apprenticeship = 5.3 Abschluss

I am a reliable and dedicated person who rarely gets sick. In the summer of 2025, I successfully completed my apprenticeship as a software developer. I am currently working as a Junior Software Engineer at SIX Group AG, where I contribute to the development of various WebComponent libraries and an internal LLM based chatbot. Since my current position is temporary, I am now looking for new opportunities that offer long-term growth and stability.
